

KEITH FRITZ

## Blair

The Blair Cabinet was originally created for Dallas Designer Allen Kirsch. He needed a cabinet that could house a flat-screen television and the lift mechanism, plus stereo components. The design pulls from Directoire influences, with its simple form, classic proportions, and tapered legs, but this cabinet is also decidedly modern with the silver leafed X's over antiqued mirrors. Like any true ébéniste, Keith Fritz personally hand-carved the X's and scrolls in walnut before the silver leaf was hand-applied.
